

Yih-Ming Shin

philymshin@gmail.com

Dear Sir,

With over years of software engineering experience, I helped organizations big and small to build software systems (Java, PHP, Perl, SQL, C, HTML, CSS), and work as a full-time Quality Assurance Engineer currently. (Python script on AWS server-less platform)

I have exposed to various technology solutions and roles within SDLC/STLC in my career life, and considered myself an adaptable and flexible-to-changes individual. I believe I would be a good candidate if that's the personality traits you value most for this current job vacancy.

Please let me know if you have any questions. You can reach me by email and I hope to hear from you soon. Thank you for your consideration.

Sincerely,

Ming
